

# SAMSUNG

# DiagnoX

Guided troubleshooting for Samsung devices.

WORKING PROTOTYPE DEMO

# Generic answers fail at the moment users need help

## GENERIC CHATBOT

“My Samsung TV keeps restarting.”

---

Try restarting the TV. Check the power cable.  
Update the software. Contact support if the issue continues.

A LIST OF POSSIBILITIES — NO DEVICE STATE, NO SYMPTOM PATH.

## WHAT IS MISSING

Device

Which Samsung TV?

---

Symptom

When does it restart?

---

History

What has already been tried?

# Meet the guided troubleshooting flow

The prototype turns an open-ended chat into a visible diagnostic path.

## Device selection

Symptom input

Targeted questions

Next action

SAMSUNG TV

RESTARTING

When does the TV restart?

CHOOSE AN ANSWER

# The user starts with one sentence

DiagnoX identifies the device and problem immediately.

## USER INPUT

“My Samsung TV keeps restarting.”

## CAPTURED CONTEXT

My Samsung TV keeps restarting.

Device identified

Samsung TV

Problem identified

Unexpected restart

Next question ready

Find the trigger

# DiagnoX asks the question that narrows the branch

01

Start with the trigger

The symptom is known: the TV restarts.

02

Ask one relevant question

Does it happen during startup or while streaming?

03

Choose the next branch

The answer determines what DiagnoX checks next.

# Context stays alive between questions

## 1 Initial report

Samsung TV · restarting

---

## 2 User answers

“Mostly when I open a streaming app.”

---

## 3 Next relevant question

Now DiagnoX can continue from the streaming trigger – not start over.

# The user enters the symptom in one sentence

“My Samsung TV keeps restarting.”

01

Recognize the device

Samsung TV

02

Extract the problem

Keeps restarting

03

Set the starting context

DiagnoX is ready to ask the next relevant question.

# The diagnostic branch leads to a specific recommendation

01

---

## Branch trigger

Restart happens when a streaming app opens.

02

---

## Focused check

Check the app and TV software state.

03

---

## Next action

Update the affected app, then restart the TV once.

# Image upload adds visual evidence to the diagnosis

Upload a photo when the symptom is visible on the appliance.

## 01

### 1. Add the image

Select a damaged appliance photo.

## 02

### 2. Read the evidence

DiagnoX uses the visible damage to refine the next check.

# Safety escalation keeps the user out of harm's way

01

Hazardous symptom

Burning smell, smoke, sparks or exposed wiring.

02

Escalate immediately

Stop using the appliance, disconnect power if safe, and contact qualified service or emergency help.

03

Stay within the prototype's role

DiagnoX flags the risk and routes the user to safety guidance – it does not ask them to repair a live hazard.

# DiagnoX — Guided. Contextual. Safe.
